

# How to Solar Eclipse Safely In

## Beavers Bend Cabin Country

### Wear Eclipse Glasses

You must wear special glasses to avoid eye injury. Plan ahead and buy early. Local vendors are expected to have limited stock.

### Prepare for Emergencies

Additional police, fire, and EMT posts will be set up, but response times may be longer than normal. Have a first aid kit just in case.

### Put Out Campfires

Do not light a campfire during the eclipse. High winds may occur and emergency responses may be delayed due to traffic.

### Keep Animals Safe

Pets and wildlife will be confused. Keep pets indoors or securely leashed. If wildlife approaches, do not pet or feed them.

### Get Essentials In Advance

Excessive traffic is expected. Avoid having to get out by stocking up on groceries and gasoline ahead of time.

### Plan Your View Site

Help minimize traffic by watching from your cabin or arriving at your chosen location a few hours in advance.

### Keep in Mind

During totality, the sky will darken similar to dusk or dawn and temperatures will drop 10-15 degrees. Birds will quiet and dogs may bark.

Due to a large influx of visitors, businesses may have long waits, limited capacity, scaled down menus, or restroom restrictions.

It's a good idea to carry cash. Internet service may be interrupted and vendors may not be able to accept cards.

## When:

**Monday, April 8, 2024**

- ★ 12:28pm - Partial begins
- ★ 1:45pm - Totality begins
- ★ 1:50pm - Totality ends
- ★ 3:06pm - Partial ends
